

Fusion Online

Award-winning pre-ordering solution for
secondary schools, sixth-forms and colleges

Your complete pre-order solution

A Grab & Go food offering means that schools can offer a truly contactless service to ensure that social distancing rules are adhered to. Our award-winning pre-order app makes it easy to offer speed of service and control traffic flow with designated collection points.

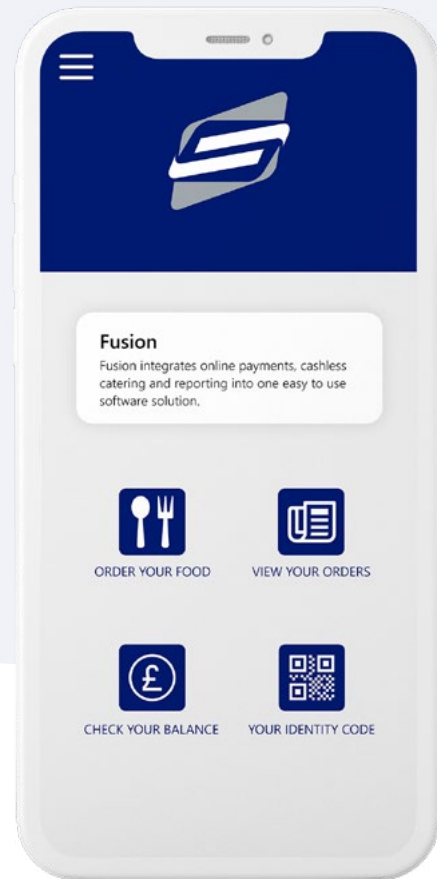

**Public Sector Catering
Innovation Award Winner 2020**

“

The Fusion Online app is the next natural progression to offer a modern service that attracts our young tech-savvy customers.

”

- Facilities and Support Services Manager,
West Lothian Council

Reduced contact

Fusion Online removes transactions from the dining hall to offer a truly contactless identification method. Secondary school pupils can order their favourite lunches directly from their mobile device to simply pick up from a designated collection point at lunchtime.

Increased efficiencies

Fusion Online sends pre-ordered meal choices to the kitchen ahead of time. This means that catering staff can prepare meals in advance for pupils to collect at lunchtime, offering schools an increased speed of service and a reduction in food wastage.

Combat food wastage

Fusion Online generates significant cost savings in avoidable food wastage.

Our Fusion cashless package provides catering managers with a host of management information, including historical data and an analytical view to better predict food trends and assist with stock ordering and long-term planning.

Increased uptake of school meals

Fusion Online is a vital platform for schools to compete with out-of-the-gate food options.

Catering staff can easily promote special offers and events such as theme days or other information directly through the app. The push-notification feature allows schools to reach pupils outside of the dining hall in a simple yet effective way.

Beyond pre-ordering

Users of Fusion Online can pre-order meals, view upcoming and previous transactions, and view their live cashless balance directly from their mobile phone or browser. This socially inclusive app is also browser-based to give access via school computers for pupils without access to a mobile phone.

Order anytime, anywhere

An innovative solution for secondary schools, Fusion Online provides a secure and adaptive platform to encourage pupils to pre-order their preferred meal options in advance, whenever and wherever they are.

No longer restricted to the dining hall, pupils can choose their favourite school meals on-the-go to ensure their order is ready to pick up at lunchtime.

Food-to-go for the pupil on the go

For pupils, Fusion Online allows them to simply grab their lunch and go, which is extremely beneficial to those attending lunchtime clubs & activities.

A seamless connection with our Fusion cashless system ensures all pre-ordered meals are instantly reflected in the pupils' live cashless account, available to view from their mobile device -eliminating the need to go to the revaluation unit to check their balance!

“

Giving pupils the flexibility to pre-order meals out with school time and from home is a really important development for parents because it will give them more input to what their children are ordering.

”

- Commercial Manager, Argyll and Bute Council, and Head of ASSIST FM

“

Fusion Online was introduced as an extension of what we offered in terms of pre-ordering and provides a further function there is a high demand for at our school. Modern and reactive, our school is benefiting from new technology as it advances, and that is something that is only going to continue.

”

- Commercial Manager, Argyll and Bute Council, and Head of ASSIST FM

From order to collection, Fusion Collect is the perfect module to complete your pre-order service.

Utilise spaces beyond the dining hall by creating multiple collection points.

To help control the flow of traffic and ensure pupils are following social distancing guidelines, schools can create numerous collection points around the school grounds.

A notification will pop up on the pupils' pre-order screen, and on their electronic receipt to let them know when and where to collect their lunch.

Flexible roaming with offline mode

Fusion Collect is the POS app allowing catering teams to manage meal collections with ease. Equipped with a list of all pre-ordered meals for a selected collection point, Fusion Collect provides catering staff with a simple way to keep track of orders that have been or are yet to be collected via tablet or portable POS.

Fusion Collect works in offline mode to provide access to your pre-order meal list no matter where you are in the school.

Seamless cashless connection

Fusion Online & Collect is the perfect extension to your Fusion cashless system to offer innovative pre-ordering to secondary schools. Together with our online payment system, iPayimpact, schools can completely remove touchpoints from the traditional lunchtime service.
